MPV COLORS

MPV FARBEN

GB.

The body of the MIKENO MPV consists of fully colored ABS plastic, the same material that is used also for the production of safety helmets. ABS plastic combines lightness with resistance to breakage and durability. The material used is of the highest quality and protected by a layer of PMMA (acrylic glass). The surface can be washed with water and gentle cleaning agents. In the event of scratches the surface can be polished with car polish.

The acrylic surface of the body parts is hygroscopic and only hardens on exposure further. Curing takes about two weeks after delivery of the vehicle

D.

Die Karosserie des MIKENO MPV besteht aus gefärbtem ABS Kunststoff, dem gleichen Material, das auch zur Produktion von Schutzhelmen verwendet wird. ABS Kunststoff verbindet Leichtigkeit mit Bruchsicherheit und langer Haltbarkeit. Das verwendete Material ist von höchster Qualität und durch eine Schicht PMMA (Acrylglas) geschützt. Diese kann mit Wasser und sanften Reinigungsmitteln gewaschen werden. Bei Kratzern kann mit Autopolitur aufpoliert werden.

Die Acryloberfläche der Karosserieteile ist hygroskopisch und härtet erst unter Einwirkung von Luftfeuchtigkeit weiter aus. Die Aushärtung dauert ca. zwei Wochen nach Auslieferung des Fahrzeugs.
